This guide has been designed to support the transition from the Infants to the Juniors.

If you have any questions or queries please contact our Computing Leader: Miss Reynolds

How can I support my child?

Computing at Devonshire Junior Academy

A computing guide for Year 3

At the start of Year 3

Your child will be given:

- A computer login
- A login for RM Unify
- An Education City login

For those joining from Devonshire Infants—it's just the same, but for Junior aged children.

Facilities

- ICT suite
- Laptops
- iPads
- Cameras

Our website and Twitter

@devonshirejun

RM Unify

RM Unify

Children will be given a personalized log-on to RM Unify.

It's a password protected virtual learning environment, where the children can access their Year Group page and find information about their curriculum topics and homework.

Education City

As a school we feel that the link between home and school is important. We provide each of our children with a password to access Education City at home. You can monitor their progress and set further challenges; making learning fun!

E-safety

A copy of our e-safety policy can be found on our website.

We provide e-safety during our Internet Safety week, but we also aim to embed the teaching of computer safety within our creative Curriculum.

The Community Police work closely with us to support the delivery of sensitive issues, such as Cyberbullying.

Parents are invited to an Internet workshop for an 'informal chat' about issues that concern them.
